EXAMINER'S ACTION

PTOL-326 (Rev. 2/93)

Serial No. 067,275

Art Unit 1106

Claims 5, 6, 9 and 10 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The description "a heat-resistant oxide" is vague and indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -(a) the invention was known or used by others in this
country, or patented or described in a printed publication
in this or a foreign country, before the invention thereof
by the applicant for a patent.

Claims 1-6, 9 and 10 are rejected under 35 U.S.C. § 102(a) as being clearly anticipated by Adiego et al (column 5, line 45 through column 6, line 64).

Inoue et al, Ito et al, Toyota Jidosha (JA) and Ind. Sci. Tech. (JA) are cited of interest.

Any inquiry concerning this communication should be directed to Dees at telephone number (703) 308-3812.
